The hero is a member of the autobots, a group of conscious self-driving modular forms of robots. In most versions, bumblebee is a small yellow Volkswagen Beetle, although from live action movies, it appears as cars inspired by several generations of Chevrolet America cars - with live-action movie versions being a yellow Camaro with black racing stripes. The original design of the automotive mode is based on a classic European type 1 Volkswagen Beetle. [1] The character is named after a bee, a black and yellow stripe, which inspired his drawing scheme. Bumblebee appeared in most of the series and later became the protagonist in Transformers: Robots in Masks, Bee and Transformers: Cyberverse. Transformers: Generation 1 Bumblebee (known as Abejorro in Mexico, Bumble in Japan, Moscardo in Portugal, Űrdongo in Hungary, Majolino in Italy, Bourdon in France) is the younger brother of the heroic or protagonist autobot faction and mascot, constantly seeking to prove himself in the eyes of other robots - especially its leader, Optimus Prime. This often causes him to take risks that put him in danger. Although a little smart aleck, he is a capable and reliable messenger and it allows him to go to places that his older commanders cannot. It has high fuel efficiency, has great visual acuity, is especially adaptable to underwater environments and turns into a yellow Volkswagen Volkswagen. It was later reconstructed into a stronger, more mature form like Goldbug. At BotCon's 2010 reception, Hasbro named Bumblebee as one of the top five robot inductees at Transformers Hall of Fame. [2] The Transformers Animated Series Bumblebee is the second character to appear in the original transformers animated series, while on a mission to restore a small clutch of energy wires with Wheeljack. Bumblebee was subsequently among the transformers aboard the Ark that crashed to Earth, causing the transformers inside to be trapped in 10 000-year-old 100-year-olds. The awakening in 1984 helped Bronhield push a river and use its small size to help its human ally, Sparkplug Witwicky, plant explosives at the height of mining operations in Deception. Bumblebee later befriended Spike's son, but on their first adventure together they were kidnapped by The Desepctic and Bumblebee's memory chip was altered as he inadvertently lured the other autobots into a trap. Bumblebee recovered in time to help his fellow Autobots stop the Decepticons from sending Spike to Cyberron. After their first adventure, Bumblebee and Spike became best friends for life, as they both realized they were a good team. On one of his missions, Bumblebee was wounded with Spike inside from a battle with the Decepticons at a missile base. Bumbleby was repaired by Ratchet while his best friend was in the hospital, but his mind shifted to the Autobot X robot created by Spark plug so that the doctors at the hospital could operate on their real one. When Spike left base as he had a side effect of the brain transfer, Bumblebee left to look for his best friend, but his radio transmitters have not yet been fixed. After finding Spike, Bumblebee tried to make his friend realize, but failed when his best friend believed he had deceived him. Bumblebee sees The Decepticons arrive at his location, but they don't see him, so he is able to hear Megatron lying to his best friend, then leave to pick up Optimus Prime and his other friends for help, who helped with repairs at the missile base where they had fought in the before. After arriving at the missile base, Bumbleby told Optimus that Megatron was manipulating Spike and that he believed him. Bumbleby was asked to lead his location by Optimus, who feared the Decepticons would find out about Spike's confused mind and take advantage of the situation to help his friend. Arriving where Spike was, Bumblebee and Prime tried to hit him, but it didn't work out as they had hoped, but both were relieved when the spiker was threatened. After the decepticons left, Bumblebee gave his best friend five when he returned to his real body when everything got better. Bumblebee's next adventure will take place when he accompanies Spike and Spaplug with Jazz to try out his new speakers, but decides to head to headquarters so he doesn't have to deal with his loud music. When Bumblebee returned to headquarters, he only saw Bluestrixtick there and that Teletraan 1 was damaged. He was then dragged into the recharge chamber by Bluestreak as Megatron placed a personal destabilizer in their rechargeable chamber to turn all autobots into evil. However, Bumblebee was saved when Jazz, Spike and Spark plug arrived just in time, while Jazz pushed Bluestrick for a while. After Spark plug fix Teletraan 1, he, Bumblebee, Jazz and Spike were shocked when Teletraan 1 told them that Megatron had turned his friends from good to evil. Since Bumblebee and Jazz were the only ones not affected by the personality destabilizer, Bumblebee decided to stop his comrades when he heard about Optimus Prime, Brawn and Prowl attacking spike with him with an air force jet base. Once they arrived, Bumblebee tried several times to get to Optimus, but to fail. Bumblebee was liberated from his friends from desepctic control after Spaplug invented Stock Exchange Attitudes to counteract personality destabilizers, with the exception of Prime. Bumbleby took the last as there were no others left as he wanted to make one last attempt to bring Optimus back into his senses. Bumblebee told his friend/guide that he was not evil and believed in him, then encouraged him to fight megatron control too not to give up. The beekeeper quickly set the mindset of Optimus, who heard his voice, which freed him from desepctic control. Bumbleby was embraced by Prime as a thank you for not reaching out to him and saving him. After stopping The Decepticons, Bumblebee was again thanked by Optimus Prime, who also thanked everyone for their help, for what he did for him. Bumblebee's with Spike gave Ratchet and Spakplug tools as they needed to determine the Air Force planes destroyed while Megatron was under Megatron's control. Bumblebee later befriended a girl named Carly, who admired the autobots. While testing one of Wiljiack's inventions, Bumblebee struggled with Decepticons as they wanted to steal it, which they managed to do. After the fight, Bumblebee and Spike went looking for Carly, who left the base to help them, as she thought it was her fault that the Desepctic had received the invention due to the fact that she was there when they tested it. Bee and Spike found Carly with Ironhide, who rescued her from the Decepticons, but didn't go too far when they saw their friend wasn't behind them. Going back into robot mode, Bumblebee wonders what's going on then saw that Ironhide had isolated. After From the autobots showed up, Bee and Spike and Carly hid, and everyone agreed they had to do something. Bumblebee signaled jazz to make his sound and light show, which distracted The Decepticos, so Carly could reverse the process of Wheeljack's invention. After the battle was won, Bumblebee encouraged Spike to ask Carly, knowing that they had feelings for each other. When the body of the late Optimus Prime is recovered from space by a pair of scientists who hate transformers who intend to use it to lure autobots into a trap, Bumblebee is part of the rescue team led by Rodimus Prime to recover it. Entering the lab, some transformers are exposed to furious foreign spores that can infect them with plague, causing them to get angry, and although Bumblebee avoids infection, it is severely damaged by the infected rampirane Superior. A member of the alien race called Quintes subsequently repaired and restored Optimus Prime for life so that he could stop the hate plague and repair the Bee. The little Autobot was so badly damaged that it required a whole reconstruction and was rebuilt as a throttle. In his new, shiny body, he commented that he had gone beyond the simple old bee buzz and is now a golden bug, prompting Optimus Prime to blackout it Goldbug. Goldbug traveled with Optimus Prime to chaar's desepctic planet to provide a heat-resistant alloy that could protect it from the plague, only to be infected on the mission and later cured when Prime used the power of the Matrix of Leadership to clear the plague. Due to an animation error, Bumblebee appeared in a wide frame in celebration with Goldbug, where he was seen jumping and cheering during the final episode of the series. Bumblebee and Optimus Prime are the only autobots to appear in all seasons, especially the first and final episode of the cartoon. Bumblebee appears in the latest episode as an animation error, but he counts himself as the main character who appears. Bumblebee appeared in Generation 2: Redux, Botcon magazine, which was defined after the events of the last episode as Goldbug, which fought the Decepticons in Switzerland alongside Jazz, Sideswipe, Beachcomber and Seaspray and became Bumblebee again in its G2 color under the Forreton. Transformers: The Directors in Transformers: The Directors, Goldbug and the other Throttlebots were in Cybertron when Vector Sigma began to destabilize as a consequence of the launch of Optimus Prime Energy of the Disease Cure Matrix in the previous year. Decepticons soon invaded the planet in an attempt to take control of the computer, and Goldbug and Throttlebots joined Dinobots Grimlock and Slag in holding the line against them. Unfortunately, they were knocked unconscious by the hypnotic power of the new Desepctic Director Mindwipe, but they were able to slow down the Decepticons long enough to arrive and Battle. 1. 1. disappeared after this encounter, suggesting that they may have been destroyed, but they eventually reappeared months later as the Decepticons carried out their final plan to destroy the Earth. Goldbug and Throttlebots teamed up with Fastlane and Cloudraker to investigate the appearance of death tower in Santiago, Chile, only to find their predecessors waiting there. Naturally, the small bots were not for the powerful combiner, but they fought bravely, clinging to his limbs before being pinned aside. Luckily, the target administrators arrived in time to secure them and take them. It's also because of the cuts that happened in the middle of the film. Books Ballantyne Bee Books is featured in Discover Your Destiny Junior Dinobots Hit by Casey Todd and Battle Drive by Barbara Siegel and Scott Siegel. Kid Stuff Records " Records " Records " Bumblebee is featured in audio and book adventure Doom Satellite published by Kid Stuff Records ". Modern publishing bumblebee has been featured in transformers since 1993: Generation 2 coloring book Desepton Madness by Bud Simpson. [3] Bumblebee comics appear in numerous comics and related media printed by various publishers. 3H Enterprises Bumblebee appeared in the voice play of actors performed in BotCon 2014, in which a device built by Rhinox to stop Unicron from pulling victims of other dimensions inadvertently transported an Auto Shuttlebot under Bumblebee's command in the middle of a battle between Rattrap, Silverbolt and Waspinator and a team of Unicorn agents. Bumblebee's shuttle can polish Ratrep and company when their ship is destroyed. After saving more from Unicorn's victims than the Decepticons, bumblebee's team returned to their own time. Condor Verlag In a story called With their blasters you will know them ... from Transformer Comic-Con issue #12 by German comic book publisher Condor Verlag Prime instructs Backstreet, Bumblebee and Ruckus on how to identify the autobots from The Deseptics in battle with Ark's computer. [4] Devil's Due Publishing In Devil's Due was the first G.I Joe vs. Transformers crossover, but the evil terrorist organization Cobra were the first to reveal the Whale and transformers, getting stuck in it, capturing and reformatting a large number of them to use as military machines. Bumblebee and Wheeljack are able to avoid this fate, contact the team created to respond to the threat of Cobra, G.I. Joe, and help free their fellow Autobots. Unlike most autobots that have new alternative modes, Bumblebee and Wheeljack have the original generation 1 alternative modes in this series. In the second cross, Bumblebee was among the autobots sent in time due to a Telegraph-3 computer incident. As part of a small group transported to the 1970s, Bumblebee like a small economy car (his time, road, AMC Pager) before team Joe and Cobra returned all the transformers to today's Cybertron. Bumblebee was sent to the third series of crossover, as he Grimlock, Arcee and Perceptor were sent to Earth to help G.I. Joe eliminate the impact of cybertron technology on the planet. Sporting his original alternative regime again, he has been shown to have something of a fall on Arcee. When Cobra attacks the base, the autobots help repel the cobra battle's Android Trooper armies. Travelling to Seibertron to stop Serpentrion, the mismatched group was first planted by the Cannibalizers, then by Serpenter, PyraKon, Betraying and Anticons, with Bumblebee badly injured as he moved straight to Predaking's leg. He was then executed by Serpenter, who would later comment that Bumbleby's death was the only thing that ever made him feel emotions. Although the character is difficult to kill, it seems his death is permanent, as Serpenter says he felt something was leaving him, most likely his spark. In the latest issue, a statue of his memory is seen. His death will continue to have consequences, as seen in the fourth series, in which Ironhide confronted the escaped autobots, but Piro persuaded them to return to Earth with him.
